

TEST REPORT: SoloStar-II vs. Omega 8005

TESTED: SOLOSTAR-II vs. OMEGA 8005

DATE: 10-27-04

1. CARROTS

	SOLO STAR II	OMEGA 8005	REMARK
PRODUCE in g.	1350g	1350g	*SoloStar-II showed 40.6% higher yield than the Omega 8005.
Juice before strain in g.	780g	540g	
Juice after strain in g.	710g *	505g	

2. APPLES

	SOLO STAR II	OMEGA 8005	REMARK
PRODUCE in g.	1500g	1500g	**SoloStar-II showed 5.8% higher yield than the Omega 8005.
Juice before strain in g.	1280g	1270g	
Juice after strain in g.	1190g **	1125g	

3. CELERY

	SOLO STAR II	OMEGA 8005	REMARK
PRODUCE in g.	435g	435g	***SoloStar-II showed 8.3% higher yield than the Omega 8005.
Juice before strain in g.	340g	320g	
Juice after strain in g.	325g ***	300g	

CONCLUSION:

- Highest juice yield from the SS-II overall, showing the superiority of the 2nd Generation Dual-Stage Juice Extraction process (SoloStar-II) over the 1st Generation Dual-Stage Juicing System (Original SoloStar and the Omega 8005).
- Biggest difference in juice yield shown in the carrot test.
- Carrots: SS-II yielded 44.4% more juice than the Omega 8005
